PRODUCT FAMILY / 20 SELECTION REFERENCES

Screws & Fasteners

Assembly hardware for cabinet frames, mounting plates, covers and electrical connections.

Illustrative category image; supplied configuration is confirmed at quotation.

PRODUCT OPTIONS

Hex bolts & nuts / Socket-head screws / Flat & spring washers

INCLUDE IN YOUR ENQUIRY

- Thread size / length
- Material / surface finish
- Assembly location

MODEL & SPECIFICATION REFERENCES

Screws & Fasteners

Select a reference and add quantity, material / finish, dimensions and the application requirements. Final supply is subject to quotation.

REFERENCE	CONFIGURATION	INFORMATION TO CONFIRM
ISO 4017 / M4	Fully threaded hex bolt M4	Specify length, material and finish.
ISO 4017 / M5	Fully threaded hex bolt M5	Specify length, material and finish.
ISO 4017 / M6	Fully threaded hex bolt M6	Specify length, material and finish.
ISO 4017 / M8	Fully threaded hex bolt M8	Specify length, material and finish.
ISO 4017 / M10	Fully threaded hex bolt M10	Specify length, material and finish.
ISO 4762 / M4	Socket head cap screw M4	Specify length, material and finish.
ISO 4762 / M5	Socket head cap screw M5	Specify length, material and finish.
ISO 4762 / M6	Socket head cap screw M6	Specify length, material and finish.
ISO 4762 / M8	Socket head cap screw M8	Specify length, material and finish.
ISO 4762 / M10	Socket head cap screw M10	Specify length, material and finish.
ISO 4032 / M4	Hex nut M4	Specify material, grade and finish.
ISO 4032 / M5	Hex nut M5	Specify material, grade and finish.
ISO 4032 / M6	Hex nut M6	Specify material, grade and finish.
ISO 4032 / M8	Hex nut M8	Specify material, grade and finish.
ISO 4032 / M10	Hex nut M10	Specify material, grade and finish.
ISO 7089 / M4	Flat washer M4	Specify material, grade and finish.
ISO 7089 / M5	Flat washer M5	Specify material, grade and finish.
ISO 7089 / M6	Flat washer M6	Specify material, grade and finish.
ISO 7089 / M8	Flat washer M8	Specify material, grade and finish.
ISO 7089 / M10	Flat washer M10	Specify material, grade and finish.

Specify thread, length, head style, material, finish and required quantity. Connection hardware must suit the assembly drawing and tightening requirements. References describe common geometry and nominal metric sizes; they do not assert compliance of an untested supplied part. For washers, M size denotes the mating fastener. DIN 933 and DIN 912 are legacy names; use the current specified ISO drawing for ordering.
